Subject of Planning Application

Comments and Objections.

I strongly object to the erection of Wind Turbines on the proposed site.
There is no need for such large industrial machines to be sited so close to people's homes, roads and footpaths.

Placing large, fast moving machines in this populated area would cause public and highway danger.

Extensive mining has made the proposed site unsuitable for turbines of any kind.
The ground is unstable.

Their size and scale and the prominence of the proposed site would cause them to dominate the landscape in green belt. They would spoil the countryside and affect wildlife.

The shadowing, motion nuisance and constant noise produced would be unacceptable.
